Dear Pacific KVAR,

I'm writing in response to your product called, Power Factor Optimizer. My name is Karnaljit Singh and I am a manager at Valero. I have been working at Valero for the past fourteen years and I have noticed my electrical bill increase significantly over the past years. It came to my attention that I needed to do something about this problem.

Two of my customers Randy and Lee referred me to your product. It seemed too good to be true. I did some research about this product and I decided to give it a try. The people who installed the Power Factor Optimizer promised me that I would save up to ten percent on my next bill. I was skeptical about this percentage.

I am very happy and pleased to say that I have saved on my first bill, twenty percent of what I was paying previously. Your product is absolutely wonderful and money saving. As a small business owner my goals are to provide great service, great gas and save as much money as I can. The Power Factor Optimizer does just that, it helped me save some much needed money.

Additionally, I have highly recommended your product to other business owners, so they can also benefit from your product. I am happy to say that I am looking forward to seeing my next bill.

Thank you very much.

Sincerely,

Karnaljit Singh
